Here, I received a token of discussion for ä œResolver a known problem. You receive argument tokens talking about the different arguments that the NPC Tamm. If you are talking to an NPC and forget what they said, click on the top right with the speech bubbles to review a transcript of what they said. The interrogation point also provides a reference of the vain parts of the story and the civics in the game for players that are confused. The game does not do nothing if I put the token in the wrong area. Once I received this argument token, I could use it to ä œSvate this IDE in speech or in writing. In the end, I will write a pamphlet, but first I need to collect more of these tokens to talk to other characters before I can move on. When I finished this introductory part, the game told me that talking to a person in a state will tell me if they are inclined to the federalist or anti-federalist side. I think this is the game telling me that I have a certain amount of turns before the vote is performed and I can no longer change people's minds. The first state to ratify according to this timeline will be delaware. The game suggests that I need to talk to more people, I talk to this guy: I could talk to two different people this round. I found that if I kept asking questions at the game, I would make me move on instead of moving forward immediately. I got more chips. I also have to select the right questions to produce a good argument. If I ask questions that they are not being, the game will not give me more chips. Now I have enough chips to write about the side I want to advocate. I have to choose a pseudä, which was different, depending on whether I selected writing to the federalist or anti-federalist side. If I try to publish The wrong type of argument token, the game tells me that I made a mistake and I will make me do it again, but if I make more than once you lose points. After correcting the error, it allows me to print the pamphlet. They need to move their impression to cover the states you are interested in convincing. After printing the pamphlet, it makes states more in favor of the perspective for which I am defending. At this point, the round ended and the game totals my points. After receiving my points, I learned that there is another NPC that is printing leaflets in opposition to mine. This makes my work more difficult. In the second round, with the addition of the new NPC and the fact that there are now three people I could interview, even if you still have permission to interview two, I realized that this game involves much more strategy than I thought for the first time. It is good that they recognize how the constitution has not dealt with slavery, calling it "moral" failure. In this conversation, the NPC talks about slavery and the compromised fifths. I think this is an important part of the discussion around our constitution, so I'm glad they included it. This NPC was against the constitution because it did not deal with slavery correctly, but after I spoke to him, the game allowed me to interview an enslaved character that was in favor of the constitution. I was surprised that her argument different from the previous argument of the NPC. At this point, strategy was becoming more important, and I had to make some differing decisions to get the best results. I continued interviewing the anti-federalists. It is difficult to know which side they are to talk to them, at this moment it is too late and ended up being able to shake New Hampshire to the federalist side. I think it is good that strategy is challenging, because this game is for teaching students and dio. If the game were very fancil, they would be bored. Oops. I made an error in the last round and lost the latest states. Well, I still received it laer laer o erbos sotaF ednerpa ÄÄcov ,lanif oN Process, so it has taken it to be completed and the declaration of rights has not been added to 1791. Conclusion I think this game is to explain the reasons for which people were in favor and against the ratification of the constitution. This gives many subtle arguments that the federalists and anti-federalists had them, packing them in a fancil and fun format to understand. The other great thing about Icivics is that teachers can assign a test before and after the game to test students' knowledge and ensure that they get involved with the game. Teachers can also see the points that students received for the game. Icivics states that this game takes between 30 and 45 minutes, however, I think if you read everything and are trying to get the best score, it will probably take you longer. There are two things that are different about this game versus ä œYou are the historian. It is more important for students to understand the civic arguments than real history events. This is clear that the plot of players will not combine with the timeline of the events of the constitution ratification. The second is that this game is less accessible, because it is not the whole text to the players. As this game is intended for older students, programmers probably expected students to read for themselves, but still provided them with help if they needed it. In addition, this game required much more strategy, which would be difficult for younger students to manage. I still think it is an educational and engaging educational tool. Although the story is not perfect, it still provides players for many history information. in formation.
